

Solomon I. Khmelnik, PhD

I have lived and have been working in Moscow.

I have a Ph.D. in computer hardware design.

In Russia I worked for several years developing computers for missile systems. Next, I worked at the state's scientific research institute for electric power engineering.

In Israel I worked for several companies, including the Israel Electric Corporation. Next, I started my own company which developed a special purpose processor. All the while I was engaged in independent research.

My focus was the mathematical aspects of electrical, electrodynamics and electromechanical systems.

During this time I have published over 300 hundred articles, patents and books.

I am over 10 years publishes international periodic multiple-discipline scientific and technical printing magazine in English and Russian "The Papers of Independent Authors", ISSN 2225-6717, in Russian and English.

To date published 35 volumes , where the 443 articles published by 144 authors from 13 countries. Among the authors of 54 professors, doctors and candidates of sciences.

This is the first printed UNrefereed magazine. Lack of refereed (and justification for this on the first page of the magazine) is often considered a drawback of the magazine. Institute for Venture Science is a bright and convincing proof of this.
